The inaugural Fowler Symposium addresses recent advances in host-microbe interactions, a cross-cutting topic that plays an integral part in the advancement of modern molecular biology. The Fowler Symposia series, funded by the Frank and Yolande Fowler Endowment in Modern Molecular Biology and hosted by the FSU Department of Biological Science, features leading investigators in important areas of modern biological science with relevance to cancer research. It also provides a venue in which local researchers, including graduate students and postdoctoral fellows, can showcase their research.

Agenda:
• Scientific talks from invited external and FSU researchers
• Poster presentations by students and post-docs
• Wine and Cheese Reception

Invited Speakers:
• Dr. Thomas Shenk (Princeton University)
• Dr. Dennis Kasper (Harvard University)
• Dr. B. Brett Finlay (Univ. of British Columbia)
• Dr. Grant McFadden (University of Florida)
• Dr. Klaus Fruh (Oregon Health & Science Univ.)
• Dr. James Alfano (Univ. of Nebraska-Lincoln)
• Dr. Kenneth Roux (Biology, FSU)
• Dr. Timothy Logan (Chemistry & Biochemistry, FSU)
