Thank you for your interest in becoming an esteemed intern of Treasure Coast Irrigation, LLC and Rood Landscape LLC. Here, we pride ourselves on developing leaders, not only in the industries that we serve, but throughout our communities. We strongly believe that the way to invest in our organization is to invest in others. And so, we hope to be given this opportunity to invest in you. By embarking on this internship you have put yourself in a position to open many opportunistic doors in order to spur you along on your path to success. It is our goal that your time here at TCI/Rood will be an unforgettable experience that will translate into an undeniable educational experience that will empower yourself as a leader, develop yourself through personal growth, and ultimately play a significant role in the success of your future endeavors.

**Phase 1: Introduction to Week-Internship at TCI/Rood**

This week long internship is designed to introduce the intern to the industry through a well known and established company. The intern will have the opportunity to shadow an array of managerial personnel throughout the following departments: Landscape Maintenance, Landscape Design & Installation, Pruning, Irrigation Maintenance, Irrigation Construction, Spray and Fertilization, Sales, Administration, Marketing, and Accounting. The Owners, Scott Fay and Tom Balling will also offer time and attention to the intern through a Q & A session and overview of the entire week on the final day.

This is a cram packed week that is well structured to give the intern the most educational and memorable experience possible. During this week the intern will experience a sufficient amount of hours to receive a college internship credit. Only three students will receive this opportunity to intern and only one intern will be selected to move on to the Paid- Summer Internship program.
PHASE 2: INTRODUCTION TO SUMMER INTERNSHIP:

The Rood Landscape and Treasure Coast Irrigation Summer Internship is the second phase in completing this program to its entirety. Only one intern will have the opportunity to move on from phase 0 in order to sufficiently shadow all aspects of the company. You will be presented with “hands-on” departmental experience through working with a variety of crews including Landscape Maintenance, Landscape Design & Installation, Pruning, Spray and Fertilization, Irrigation Maintenance, and Irrigation Construction. The typical hours during each work week will be similar to that of a full-time employee as this is a paid internship.

In addition to the hands on experience, you will also be given one-on-one time with the department managers in order to answer questions in a more in-depth manner than during Phase 1 of this program. The goal of the Summer Internship is to give you a more in-depth and well-rounded education of the company. By the end of this phase, you should have a more clear idea of where your focus lies if the opportunity for admittance into our Professional Internship were to present itself.
PHASE 3: INTRODUCTION TO PROFESSIONAL INTERNSHIP:

The Rood Landscape and Treasure Coast Irrigation Professional Internship is the final Phase in completing this program. The benefits of this program are beyond the scope of what was offered in the previous stages. Once again, the typical hours during each work week will be similar to that of a full-time employee. As a professional intern you will focus on the specific department that both satisfy your interest and the company’s needs. There are many benefits upon qualification for this position such as pay raise, company-funded certification opportunities, use of a company vehicle, as well as many other perks. However, one of main benefits is that you will truly be able to attain in-depth experience from the selected position as well as be mentored by your supervisor along the way. This will ensure that both you and the company are experiencing the most effective and efficient development as possible. This final phase will last for the remainder of the calendar year which will then lead to the final decision and opportunity for permanent employment.

We would love to set up a video conference call with you to meet our owner Scott Fay and answer all of your questions!
